

Hands-On Fetal Echo Learning Lab Session

Thursday, December 8, 2022

The Hands-on Fetal Echo Learning Lab session will be back this year for the Phoenix Children's 13th Annual Fetal Cardiology Symposium. Chaired by Dr. Rob Puntel, this pre-conference session will allow attendees to scan live pregnant models, alongside expert sonographers and physicians. Take advantage of this unique opportunity for live, hands-on assessment of basic to advanced fetal cardiac ultrasound evaluation at the bedside. Attendees will be provided with a great fetal echo reference guide to take home with them. There is limited space for this session, so be sure to register soon!
