

Center for Fetal and Neonatal Care at Phoenix Children's

Comprehensive care for mother and baby

As an expectant parent, hearing that your baby may be born with a birth defect or medical condition can be very difficult. No parent or family should take this journey alone. That's where our team at the Phoenix Children's Center for Fetal and Neonatal Care can help.

The Center for Fetal and Neonatal Care has one of the best multidisciplinary teams of specialized pediatric providers in the country who treat a wide variety of fetal and infant medical conditions. We provide mother and baby with the most comprehensive care possible before, during and after delivery.

By the Numbers

1 Only Neuro-NICU in Arizona for pediatric brain and neurological conditions

Level IV NICU, the highest level of care

4 sites of care for neonatology services

13K+ patients evaluated each year

250+ fetal MRIs performed each year

950+ fetal echocardiograms performed each year

33 NICU beds

22 diagnosis-specific multidisciplinary clinics

We offer a comprehensive continuum of extraordinary care. It's this level of high-quality care that earned us national rankings by *U.S. News & World Report* in 8 pediatric specialties — many of which involve the Center for Fetal and Neonatal Care.

Coordinated Care

At the Phoenix Children's Center for Fetal and Neonatal Care, we create an individualized care plan with each patient, depending on the needs of mother and baby. Comprehensive care coordination is available from diagnosis through delivery. The care team includes neonatologists who are specially trained to treat newborns, as well as pediatric experts in dozens of subspecialties to meet each baby's unique needs before and after delivery, to ensure the best possible outcome.

For babies who need it, our fetal cardiology team provides the highest level of expertise in the detection and treatment of congenital heart defects.

Advanced Technologies

From the latest in fetal imaging services, including fetal MRI, to our high-tech surgical suites and a Level IV NICU – the highest level of care available – our hospital is equipped with state-of-the-art technology designed to serve families of young children. We review results with parents soon after imaging to provide answers and develop a care plan as soon as possible.

Programs and Services

The Phoenix Children's Center for Fetal and Neonatal Care team works closely with every family to ensure the best possible care for mother and baby. Depending on the baby's diagnosis, expectant families may utilize some of the following programs and services:

- Advanced Fetal Imaging and Diagnostics
- Fetal Cardiology Program
- Fetal Neurology
- Genetic Testing and Counseling
- Level IV Neonatal Intensive Care Unit
- Maternal Mental Health
- Palliative Care
