

Growing the Health System

Meeting the Needs of Children

Arizona is experiencing unprecedented population growth. The number of children in our community is rising, too – and so is the need for pediatric-specific health services. Phoenix Children's is answering the call with major expansion efforts across our region. It's all to ensure Arizona families have access to high-quality healthcare, right in their own communities.

East Valley

Phoenix Children's is growing our services to meet the needs of the East Valley's burgeoning population of families, from newborn and primary care to a pediatric emergency department and specialty services.

East Valley Services:

- Five-Story Hospital
- Emergency Department
- Surgical Care
- Urgent Care
- Multi-Specialty Clinics
- Physical Therapy
- Sports Medicine
- Primary Care

Phoenix Children's Hospital – East Valley

Opening in 2025 on the Dignity Health Mercy Gilbert Medical Center campus, the five-story, state-of-the-art hospital offers 24 pediatric beds, a 24-bed pediatric emergency department, surgical services and diagnostic imaging. The centerpiece of the hospital is the Dignity Health and Phoenix Children's Women's and Children's Pavilion, which integrates top-quality pediatric and maternity care and offers 24 labor and delivery rooms, 48 postpartum beds and a 60-bed Level III neonatal intensive care unit (NICU).

Opening in 2025

Phoenix Children's Specialty Clinics – Gilbert

These clinics opened to provide East Valley families with comprehensive pediatric specialty health services closer to home. The clinics bring together Arizona's top pediatric subspecialists in high-demand areas including cardiology, orthopedics, cancer care and more.

Now open in Gilbert

Phoenix Children's Pediatrics

Phoenix Children's now offers primary care at seven Phoenix Children's Pediatrics locations in Chandler, Gilbert and Tempe. Patient families enjoy high-quality care from neighborhood pediatricians – and they also have access to Phoenix Children's full array of services, from diagnostics and surgery to rehabilitation and specialty care.

Serving families throughout the East Valley

West Valley

The West Valley's population is continuing to grow quickly. Phoenix Children's is growing its specialty, surgical, inpatient, sports physical therapy and emergency care to make it easy for West Valley kids to get the highly specialized pediatric health services they need and deserve.

West Valley Services:

- Three-Story Hospital
- Emergency Department
- Inpatient Care
- Multi-Specialty Clinics
- Surgical Care
- Physical Therapy

Phoenix Children's Hospital —Arrowhead Campus

This three-story hospital in Glendale offers inpatient care, an emergency department, a surgery center and imaging services. It includes 24 inpatient beds (with an additional 24 beds opening in early 2025), six operating rooms, two minor procedure rooms and 30 emergency bays/trauma rooms. Next door is a 45,000-square-foot clinic that houses orthopedics, neurology, cardiology and numerous other in-demand specialties.

Now open in Glendale

Phoenix Children's – Avondale Campus

Located in Avondale, this campus includes a 71,250-square foot multi-specialty clinic offering care in high-need specialties including cardiology, orthopedics and psychology. An emergency department offers 24/7 emergency care; 40 triage, treatment and resuscitation patient rooms; and imaging services.

Now open in Avondale

Phoenix Children's Physical Therapy Clinic

Today's young athletes are competing at a much higher level than ever before. They're starting younger and training harder, which has led to an increase in sports-related injuries. Phoenix Children's Physical Therapy Clinics in Avondale and Peoria provide physical therapy, rehabilitation and education services to address the highly specific needs of the West Valley's young athletes.

Now open in Avondale and Peoria

Thomas Campus

As the number of children requiring outpatient and inpatient care continues to grow, so too does our Thomas Campus. We are creating more clinical space for patient care, and more office space to support a growing workforce.

Phoenix Children's Hospital — Thomas Campus:

- Building out two patient care floors and creating additional exam rooms
- Additional office building
- Additional employee parking garage

Thomas Campus

10th and 11th Floor Build Out

When the tower opened in 2011, we left ourselves room to grow. It was clear the time had come to build out floors 10 and 11 for an expanded 88,000 sq. feet. These patient care areas include 97 additional beds, plus playrooms and family lounges. Floor 10 opened in early 2023 and floor 11 — a new Neonatal Intensive Care Unit — opened in spring 2024.

Office Building

This three-story office building provides more than 94,000 square feet of work and collaboration space for clinicians and staff. Relocating these existing employees from other locations on the Thomas Campus creates more space for patient care in existing buildings. This building opened in 2024.

60 New Exam Rooms

By relocating clinical employees to the new office building, we created space for approximately 60 exam rooms for neurology, rheumatology and nephrology clinic areas. Construction began in late 2022 and is scheduled to be complete in 2024.

Neurodiagnostic Sleep Lab

The existing neurodiagnostic sleep lab was moved and expanded on the third floor. The area is 6,400-sq-ft and has 8 EEG/EMG rooms with support areas. Construction was completed in spring 2023.

Parking Garage

An additional employee parking garage was needed on this campus to support a growing workforce. In 2024, construction was completed and the additional garage created more than 650 new parking spaces. It was built to accommodate a future medical office building on the top.
