

Phoenix Children's — Avondale Campus

Answering the call for care closer to home

Population growth in Maricopa County is heightening the need for pediatric-specific health services. Phoenix Children's is answering the call with major expansion efforts in the West Valley and across greater Phoenix. The goal? To enable families to access the world-class pediatric care their kids need and deserve – right in their own neighborhoods. Phoenix Children's — Avondale Campus offers a multispecialty clinic and a pediatric emergency department.

Multispecialty Clinic at Phoenix Children's

The multispecialty clinic at Phoenix Children's — Avondale Campus dramatically expands access to high-demand, top-quality specialty care for children. This means kids who live in the area today – and those whose families are moving to the Southwest Valley in droves – can receive treatment from pediatric clinicians in their own community.

Size, Scope & Services

The three-story, 71,250 square-foot multispecialty clinic offers 68 patient rooms, and expert care in 21 high-demand specialties, including cardiology, developmental pediatrics, endocrinology, gastroenterology, general surgery, plastic surgery, genetics, nephrology, neurology, neuropsychology, neurosurgery, orthopedic and hand, pulmonology, rheumatology, rehab therapy, neonatology, fetal development, allergy and immunology, dermatology and urology.

Phoenix Children's Emergency Department

Kids with serious injuries and illnesses have much better health outcomes in pediatric emergency departments than adult facilities. Everything at Phoenix Children's Emergency Department — Avondale Campus, from clinicians who are specially trained in pediatrics to kid-sized equipment and exam rooms, was chosen with children in mind. The new emergency department means kids in the Southwest Valley can access high-quality, pediatric-specific emergency care much closer to home.

Size, Scope & Services

Phoenix Children's Emergency Department — Avondale Campus is a 35,000 square-foot space designed to support as many as 50,000 visits annually. It provides 24/7 emergency care, 40 treatment rooms, 24/7 onsite laboratory services and round-the-clock imaging including ultrasound, computerized tomography, fluoroscopy and digital radiography.
